[redacted] Inasmuch as the Director will be unable to meet with the Joint Committee on Atomic Energy to brief them on the most recent developments in the Communist China area, arrangements were made for Mr. Lundahl and [redacted] to brief the Committee staff at 10:00 A.M. on Friday, 31 May on this subject. In discussing this briefing, Mr. George Murphy, of the Committee staff, indicated that as discussed with the Director at lunch on Friday, the Committee is interested in having him give its members a follow-up briefing on the Chinese Communist matter and an overall updating of the general briefing given the Committee at the beginning of the Congress. If convenient for the Director, the Committee would like this briefing during the week of 10 June, preferably at 4:00 P.M. on 13 June. I told Murphy I would pass this request to the Director. I also informed Murphy that we had no additional comments other than those provided by [redacted] on the Committee's chronology of events in the nuclear testing field.

[redacted] who is allegedly very close to [redacted] Westphal said that [redacted] that he had talked with State Department and expected to see Ambassador Stevenson within the next few days. He travels extensively around the world and has recently returned from the Philippines. Westphal thought we might be interested in talking with [redacted] After checking with the [redacted]

[redacted] I advised Westphal that this was not one of the areas in which we had a dearth of information, that we would undoubtedly be given the results of State's contact with him and under the circumstances felt that a direct contact with him would not be appropriate at this time. Westphal said he was under no pressure on this, however, I thanked him for calling the matter to our attention.
